C.N.P.J./C.I.C./NºINPI : 00348003001354
Apres.: Nominativa ; Nat.: De Produto
Marca: **LEITE VERDE**
NCL(7) **29** o leite verde é um alimento líquido, "in natura", do grupo dos lacteos, originário de animais (vacas, bulas ou cabras) criados em sistemas de produção exclusivamente em pastagens. esses animais têm como fonte alimentar protéico-energética apenas a biomassa forrageira da propria pastagem. o leite verde é um alimento do tipo "produtoorgânico". seu processo de produção insere-se na chamada agricultura /agropecuária orgânica ou ecologica, geradora de alimentos mais saudáveis e nutritivos. o leite verde está de conformidade com a "agenda-21 brasileira" sobre agricultura sustentável, coordenada pelo ministério do meio ambiente, não comprometendo os níveis tecnológicos já alcançados de segurança alimentar, de uma agricultura que preserve o meio ambiente e garanta a saúde.

NCL(7) **37** serviços de reparo e manutenção dos artigos a saber: aparelhos de impressão, elétricos e eletrônicos para criação por contato e não contato de imagens em artigos; impressoras a jato de tinta usando energia eletromagnética e ultrasônica para impelir tinta através de uma extremidade até uma superfície distante; lasers para imprimir ou marcar superfícies remotas; transportadores eletromecânicos e equipamentos para encadernação; impressoras eletromecânicas para rótulos, aparelhos eletromecânicos para uso em preparação industrial e venda de alimentos; equipamento para embalagem e separação de gêneros alimentícios; equipamentos e sistemas de telecomunicação e comunicação para a transmissão e recepção de voz, dados e aparições através de rádio, fios e cadeias óticas; terminais fixos e móveis de telefone, dados e vídeo; equipamento de processamento de telecomunicação de entrada, saída, gravação, monitoração, registro, teste, processamento de sinal, filtração, codificação, decodificação, compressão de dados, computação, faturamento, retransmissão, multiplexão, gerenciamento de rede e instalações de comutação; fios, cabos e fibras óticas para telecomunicações; equipamento para distribuição de cabo e terminação de cabos; equipamentos de rádio, incluindo antenas; equipamentos para transmissão; equipamentos de cadeias de rádio; equipamentos para retransmissão e comutação de sinais de rádio; produtos para transmissão de dados e do tipo pager; satélites e terminais de satélites com base terrestre; terminais de satélites móveis ou transportáveis para voz, dados e aparições; equipamentos para a conversão de sinais de voz, aparições e dados dentro de protocolos de dados alternativos; equipamentos para a modulação do fluxo de voz, aparições e dados em sinais de rádio ou carregadores óticos; sistemas e aparelhos para gerenciamento de redes de telecomunicação para comutar sinais de acordo com conjuntos de instruções em aparelhos ou dentro de sinais de dados; equipamentos de terminais para voz, dados ou aparições de forma que o terminal seja operado por uma ocorrência programada por moeda ou por cartão de pagamento; equipamentos para confirmação de moedas; cartões inteligentes e cartões magnéticos, óticos e eletrônicos; meios (máquinas, aparelhos e instrumentos) de transação comercial através de cartões de pagamento; equipamentos para a confirmação de usuários ou cartões utilizados por usuários; cartões para transações e terminais de cartões capazes de transmitir e receber dados através de barros magnéticas ou por contato elétrico magnético ou por sinais remotos óticos ou eletromagnéticos; software de computador e componentes eletrônicos, óticos e eletromagnéticos usados em equipamentos de telecomunicações e comunicações; computadores e sistemas de transmissão de dados e armazenagem de dados para arquivos médicos de pacientes ou informações médicas de ocorrência e software de computador usados em produtos para o cuidado da saúde e para imagem de pacientes, diagnóstico e tratamento de pacientes; equipamentos computadorizados para criar imagens e controlar jatos de tinta de impressoras a laser; aparelhos óticos e eletrônicos para a leitura de imagens impressas em objetos; software de computador para analisar a marcação de produtos ou marcação de produtos com utilização de código de barras, usando sistemas de codificação ótica e eletromagnética, fazendo desta forma a informação por leitura de produto; sistema de computador para o gerenciamento de inventário de produtos; equipamentos de distribuição de combustível operado eletricamente para estações de serviços; sistemas eletromecânicos para a recuperação de vapor de combustível; equipamento de segurança eletromecânico para distribuição de combustível; interface eletromecânica para compra de combustível, incluindo dispositivos eletrônicos de medição de preço e combustível, comunicação remota de voz e informação de vídeo; dispositivos eletrônicos automáticos de detecção de veículos, e comunicação remota com veículos e seu motoristas; sistemas de transação de cartão de crédito e em dinheiro para distribuição de combustível e lojas de venda a varejo; sistemas de controle de inventário para combustível e produtos para venda a varejo; sistemas de transação de segurança e equipamentos para verificação de compra; software e sistemas de computador para o gerenciamento de múltiplas estações de petróleo ou o gerenciamento de múltiplas lojas de venda a varejo; software e eletrônicos para redes efetuando transações comerciais; software de codificação de dados e eletrônicos para executar transações financeiras e dados de segurança em redes; aparelhos eletrônicos para produtos de medição; sensores eletrônicos para medição de produtos e exibidores eletrônicos de medição de peso ou outros detalhes de produtos; sistemas de computador para encadear escalas de medição para automação de processo industrial ou para sistemas de venda a varejo; aparelhos eletromecânicos para testar e calibrar escalas de medição; computadores para transação de venda e redes de comércio eletrônicas; controles eletrônicos para ventiladores e sistemas de ar portáteis; controles eletrônicos por ativação de voz; componentes passivos e ativos ótico-eletrônicos, componentes eletrônicos e circuitos integrados, tubos de força e componentes eletrônicos para aspiração e enchimento de gás (gasolina); componentes óticos e de fibra ótica; dispositivos para exibição de imagens; dispositivos para captura de imagem em espectro eletromagnético; captura de imagem em campos sônicos; geradores de alta freqüência e alta voltagem, amplificadores de força e chaves de força, sensores de gás e aparelhos de olfação eletrônicos; revestimentos de superfície para janelas óticas e para componentes metálicos; software de computador para o uso em conexão à indústria de telecomunicação; software de computador para o uso no "projeto", operação, monitoração e controle de comunicação de rede, incluindo sistemas de telefonia móvel; equipamentos de imagem médica baseados em raio-x, ressonância magnética, ultrasônica, isótopo nuclear, magnéticos, eletromagnéticos e de origem ótica; geradores e detectores de raio-x, campos magnéticos, eletromagnéticos e sinais óticos, sinais de ultrasom e radiação nuclear; aparelhos eletromecânicos para mover geradores ou detectores relativos a objetos de imagem; equipamentos de criação de imagem e processamento de imagem; equipamentos para transmissão e armazenagem de imagem; aparelhos

paa manuseio de filme fotográfico, processamento e inspeção; equipamentos de criação, processamento, gravação, manipulação, transmissão e exibição de imagem digital; equipamentos eletrônicos de radiologistas e cirurgiões, incluindo aparelhos para teste; equipamentos para inspeção de imagens; equipamentos para análise de imagens; aparelhos para monitorar pacientes; equipamentos eletromecânicos e mecânicos para radiologistas e cirurgiões para anteparo de proteção; produtos para o manuseio de pacientes; aparelhos para colher amostras de pacientes; aparelhos para injetar materiais em pacientes; equipamentos eletrônicos de operação do tipo "theatre" para imagens médicas e para a localização espacial de ferramentas de cirurgiões relacionadas ao paciente ou à imagem do paciente; aparelhos e ferramentas de cirurgiões; aparelhos para exposição de pacientes à doses controladas de radiação; componentes eletromagnéticos; eletrônicos e óticos para uso médico; dispositivos domésticos elétricos e a gás; aquecedores de água e ambientes, máquinas de lavar, fogões, secadoras, ventiladores, refrigeradores, condicionadores de ar, sistemas de controle eletrônico para aparelhos domésticos, ventiladores industriais e sistemas portáteis de ar, silenciadores eletrônicos e mecânicos para ventiladores e dutos de ar.
